Shipping and Handling Charges

Category	Continental U.S.
HumDinger	17.00
Phono Preamplifier	21.00
Preamplifiers and DACS	35.00
Power Amplifiers	50.00

We ship all large packages United Parcel Service ground services insured. For shipping to Alaska and Hawaii, as well as international rates, please contact us. Smaller items are shipped Priority Mail.

Shipping and Handling Information

Ship your equipment to AVA via insured United Parcel Service (UPS). Do not use Parcel Post for electronic equipment. Please wrap the unit in a plastic bag so dust and packing material does not get inside it. To best protect your equipment, ship only one unit per carton, and pack so the unit will survive a drop down a flight of stairs. Packing peanuts and crumpled paper are NOT adequate. Use solid foam to create a solid cushion. If you use a "pack and ship" store, make sure your name and address are affixed to the unit itself.

When sending in units for rebuilds, minor mechanical problems you may be experiencing will be taken care of at no extra charge. Most of the original circuits and their defects will simply be discarded. We would like a detailed note thou so that we are sure to take care of the problems, if any. Severe mechanical problems may require additional charges. For example, we must have a working transformer, switch assemblies, and completely assembled units with all hardware intact.

Return shipping and handling charges for surface UPS in the continental US are shown in the chart. Surface UPS is the most economical shipping option. We urge you to choose this option, as air shipping will not provide you instant service. Our products are custom built to order. Your order is not a mass produced item already sitting in the warehouse. It will be carefully fabricated to your order, and you need to allow time for this to be done.

International customers: We ship world wide using US Parcel Post, or United Parcel Service and will provide quotes for both. Please call or send us an email for further information. Many of our units can be wired for 240V operation.
